SUMMARY

Dynamic software engineer passionate about web development. I build responsive and scalable applications using ReactJS, NextJS, NodeJS, and Laravel. I focus on problem-solving, optimizing website performance, and keeping up with the latest technological trends to deliver an excellent user experience.

WORK EXPERIENCE

- Full stack developer

Oct. 2024 – Present

Sastec Group

 - Initialization and setup of the backend architecture for the Certeafles project.
 - Deployment of the backend on Cloudflare Workers and the frontend on Cloudflare Pages, ensuring a scalable and high-performance infrastructure.
 - Development of responsive web interfaces and reusable components using React.js, TypeScript, and TailwindCSS.
 - Integration of multilingual support with i18next, improving accessibility for users.
 - Implementation and customization of a text editor (TinyMCE) interacting directly with the DOM.
 - Execution of unit tests to ensure code quality and reliability.
 - Team collaboration in an Agile environment using Git and ClickUp.
 - Technologies:** ReactJS, NextJS, Shadcn, i18next, TypeScript, GitLab, ClickUp, Cloudflare, HonoJs, PostgreSQL...
- Full stack developer

Nov. 2023 – May 2024

Macentrale

 - Migrated React code from class components to functional components with hooks, improving maintainability and performance.
 - Developed RESTful APIs using Laravel and MySQL.
 - Implemented CI/CD workflows with GitHub Actions to automate testing and deployment.
 - Collaborated with the team on bug fixing, feature enhancement, and project delivery.
 - Technologies:** ReactJS, Laravel, Bootstrap, MySQL, Trello, GitHub
- Web Development Intern

Feb. 2023 – Jun 2023

3DWave

 - Developed a real-time chat and notification module using React and WebSocket.
 - Designed and implemented the database with MongoDB and integrated RESTful APIs using Express.js.
 - Collaborated with the mobile team on the initialization of the mobile application using Flutter and Dart.
 - Technologies:** ReactJS, ExpressJS, Ant Design, MongoDB, GitHub, Scket.io, Dart, Flutter

EDUCATION

- Engineer's Degree in Software Engineering

Sep. 2023 – Present

International Multidisciplinary School – EPI Digital School
- Bachelor's Degree in Embedded Systems and Computer engineering

Sep. 2019 – Jul. 2023

Higher Institute of Computer Science and Communication Techniques – ISITCom

SKILLS

- **Languages** : JavaScript, TypeScript, PHP, Python, Java
- **Frontend** : React.js, Next.js, TypeScript, TailwindCSS, Shadcn, Redux, Zustand, Antd, MUI.
- **Backend**: Node.js, Express.js, Laravel, Hono
- **Databases** : MySQL, Oracle, MongoDB, PostgreSQL
- **Methodologies & Tools** : Agile, Jira, Trello, ClickUp, Postman

LANGUAGES

- **Arabic** : Native
- **English** : Intermediate
- **French** : Advanced
